Month on Month Users

Traffic Analysis

Reducing Bounce Rate

Result

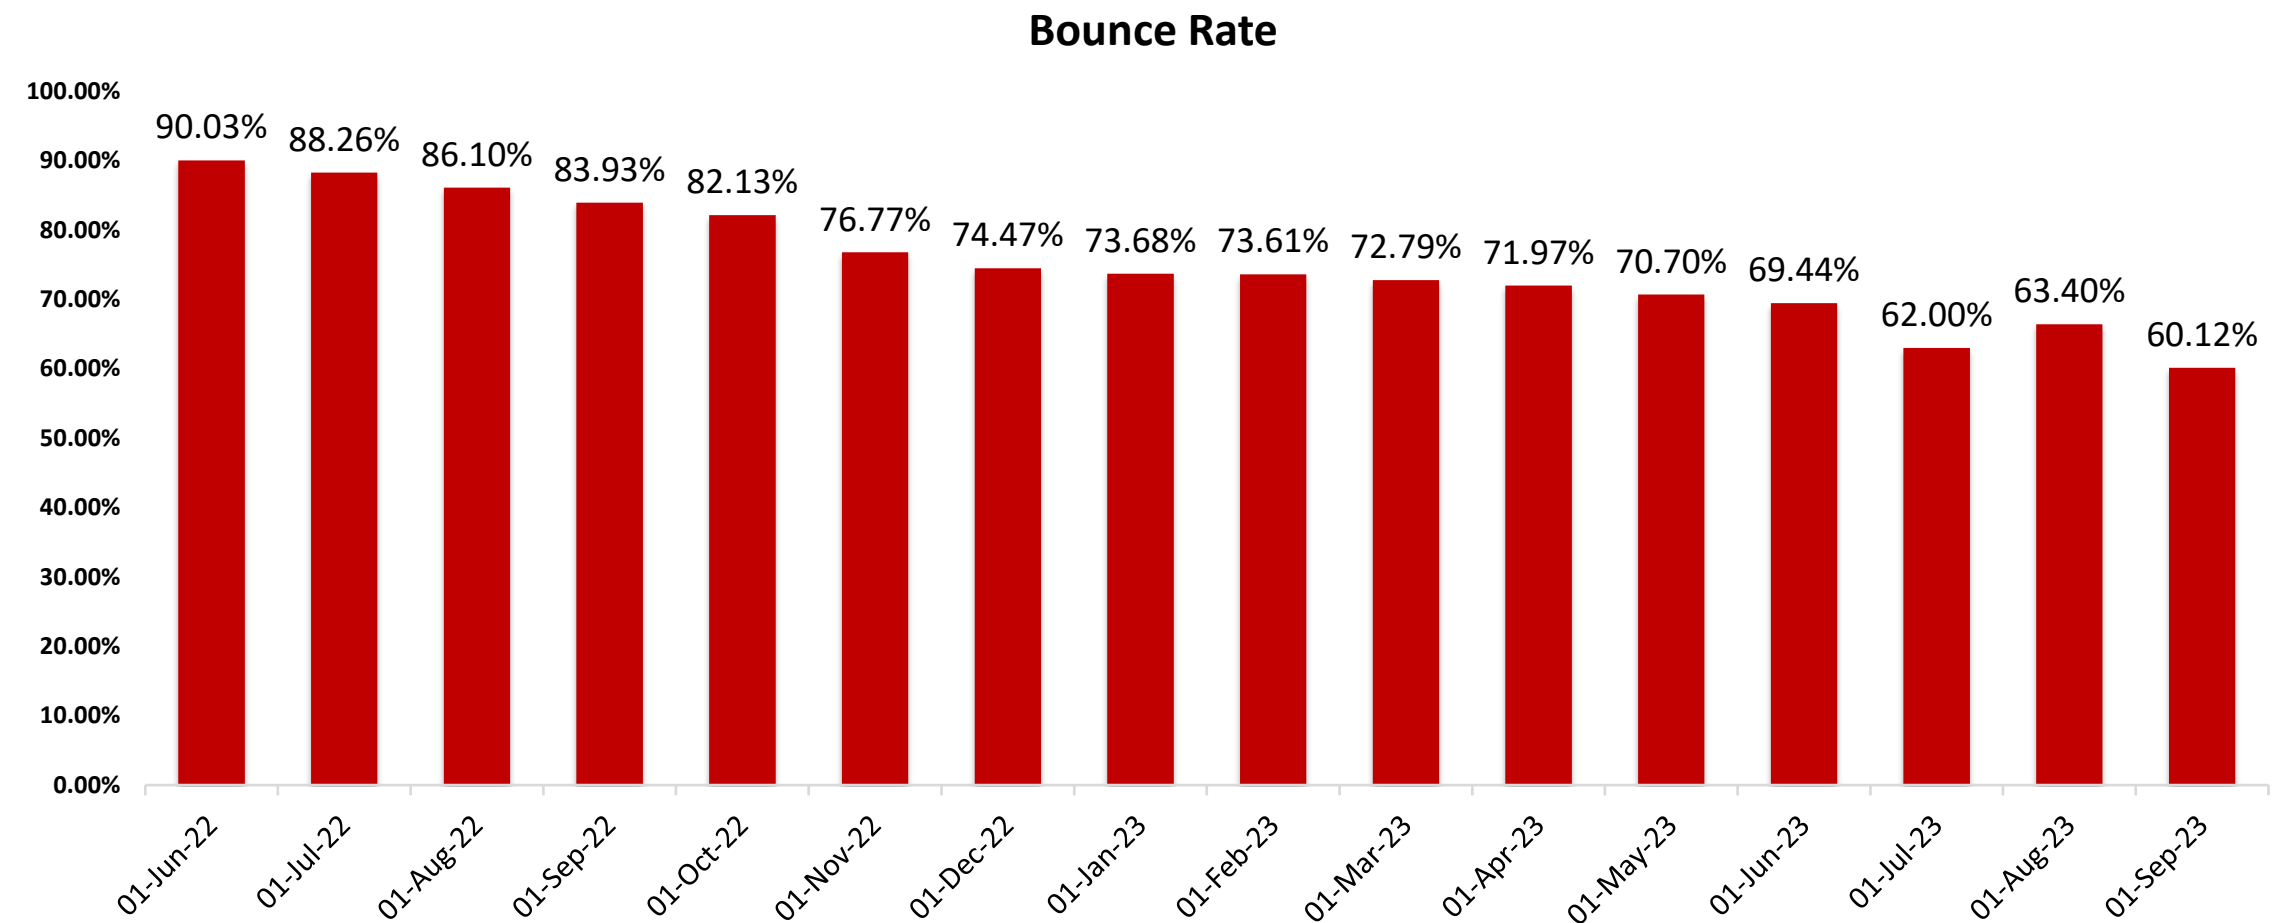

In June '22, our website experienced a high bounce rate of **90%**. However, through the implementation of specific action points, we successfully reduced the bounce rate to **60%**.

Problems :

- Missing on-page optimization in overall blog pages.
- There is poor quality content in the existing blog.
- Keywords are missing in the content.
- Images and infographics are not being used.
- Blog pages are not mobile-friendly.
- The page loading time is slow.

Action Taken :

- Revamping old content with the Yoast plugin to enhance quality.
- Utilizing AI tools for content creation to boost relevance.
- Applying the Hub-and-Spoke strategy for effective keyword utilization.
- Engaging users with images and infographics.
- Optimizing on page & technical issues for improved website performance.

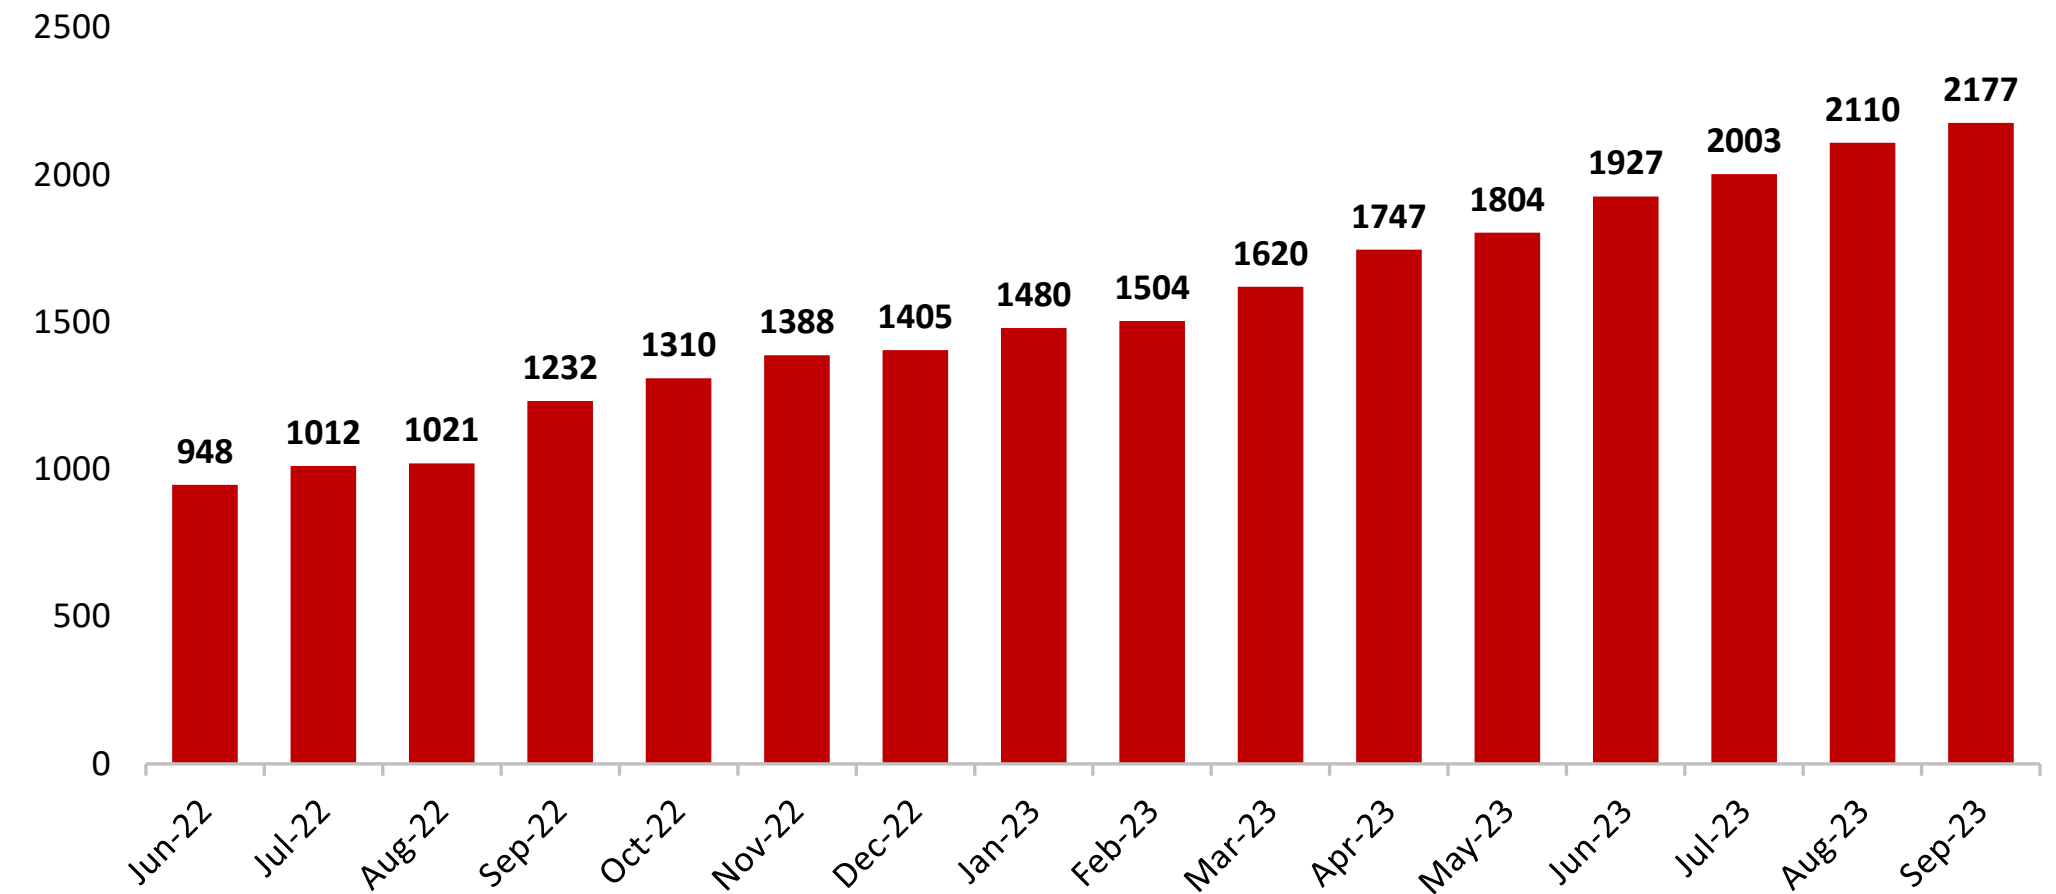

Keyword Achievement

Result

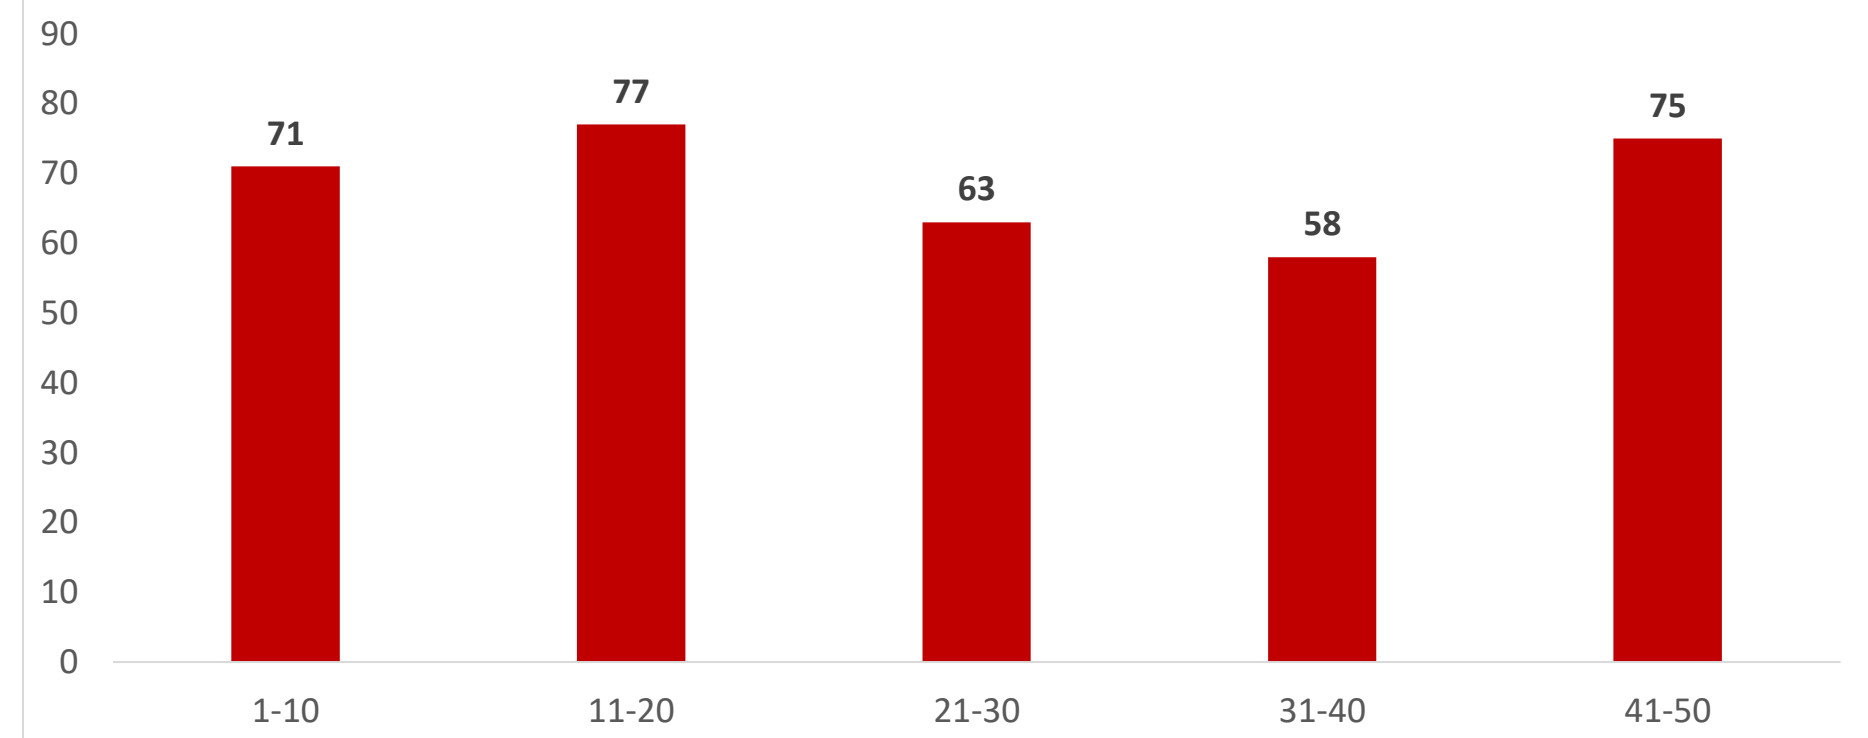

- Successfully we performed total **2177 keywords**, and we identified that **263 Keywords are ranking on first page** in search results.
- Comparing this to June '22, where **900 keywords** were initially ranking, we observed a remarkable **100% improvement in keyword rankings**.

We achieved **344 keywords** on the top 5 pages of search results for category **“Pain relief”** with a total search volume of **181,040**. Here we successfully secured **12%** keywords on the first page of Search Engine Results.

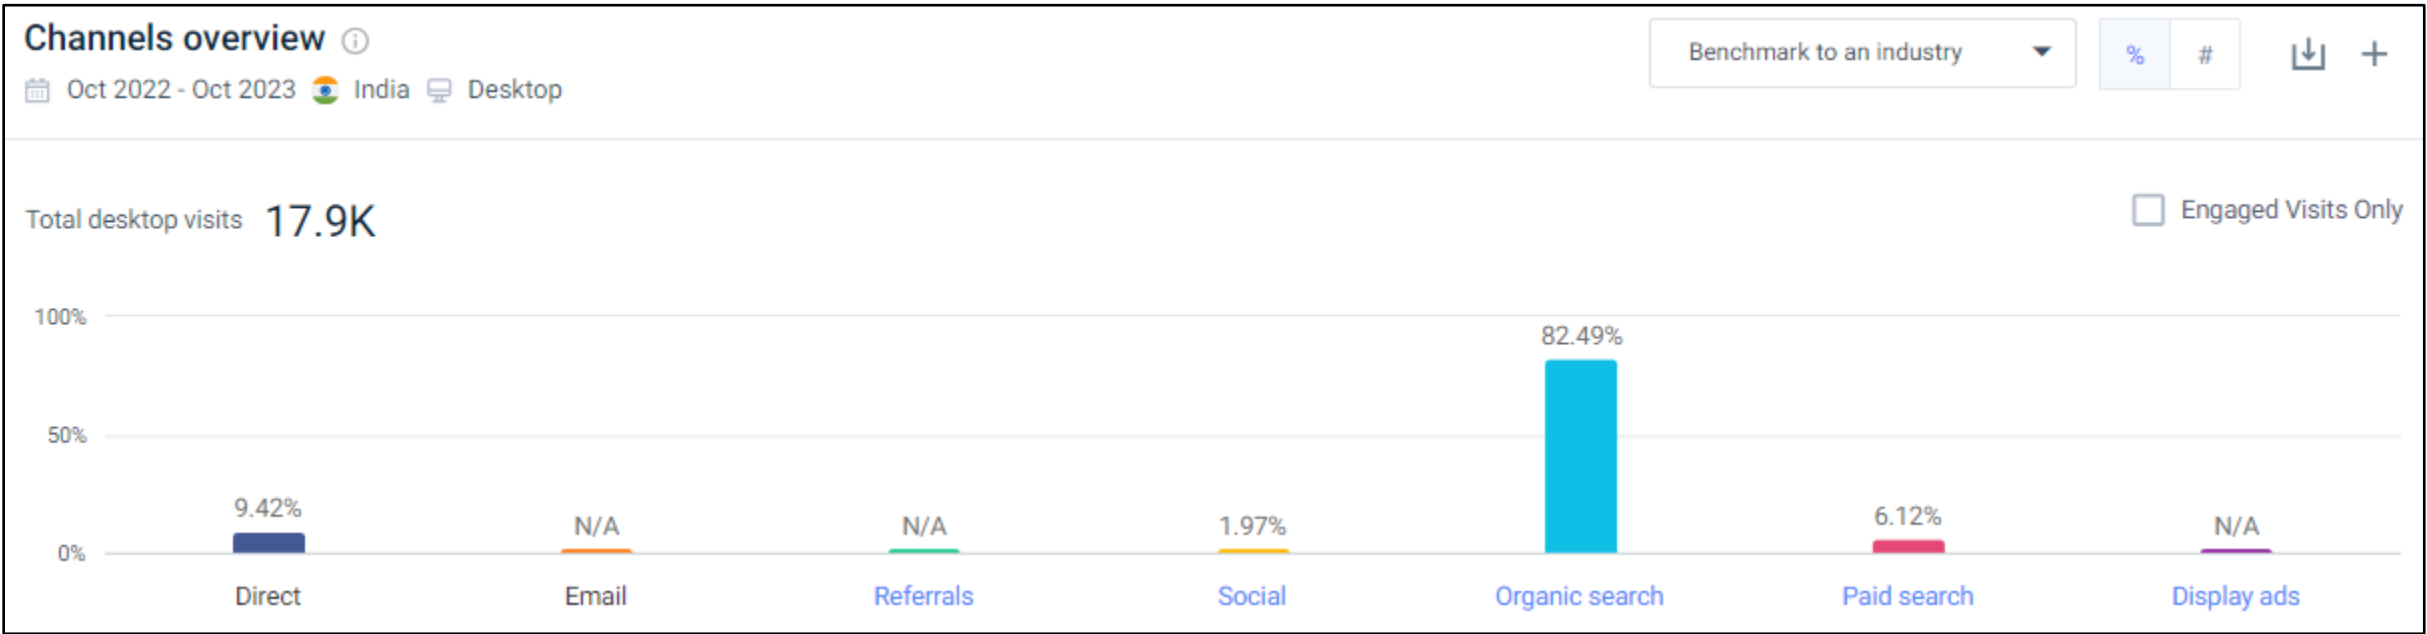

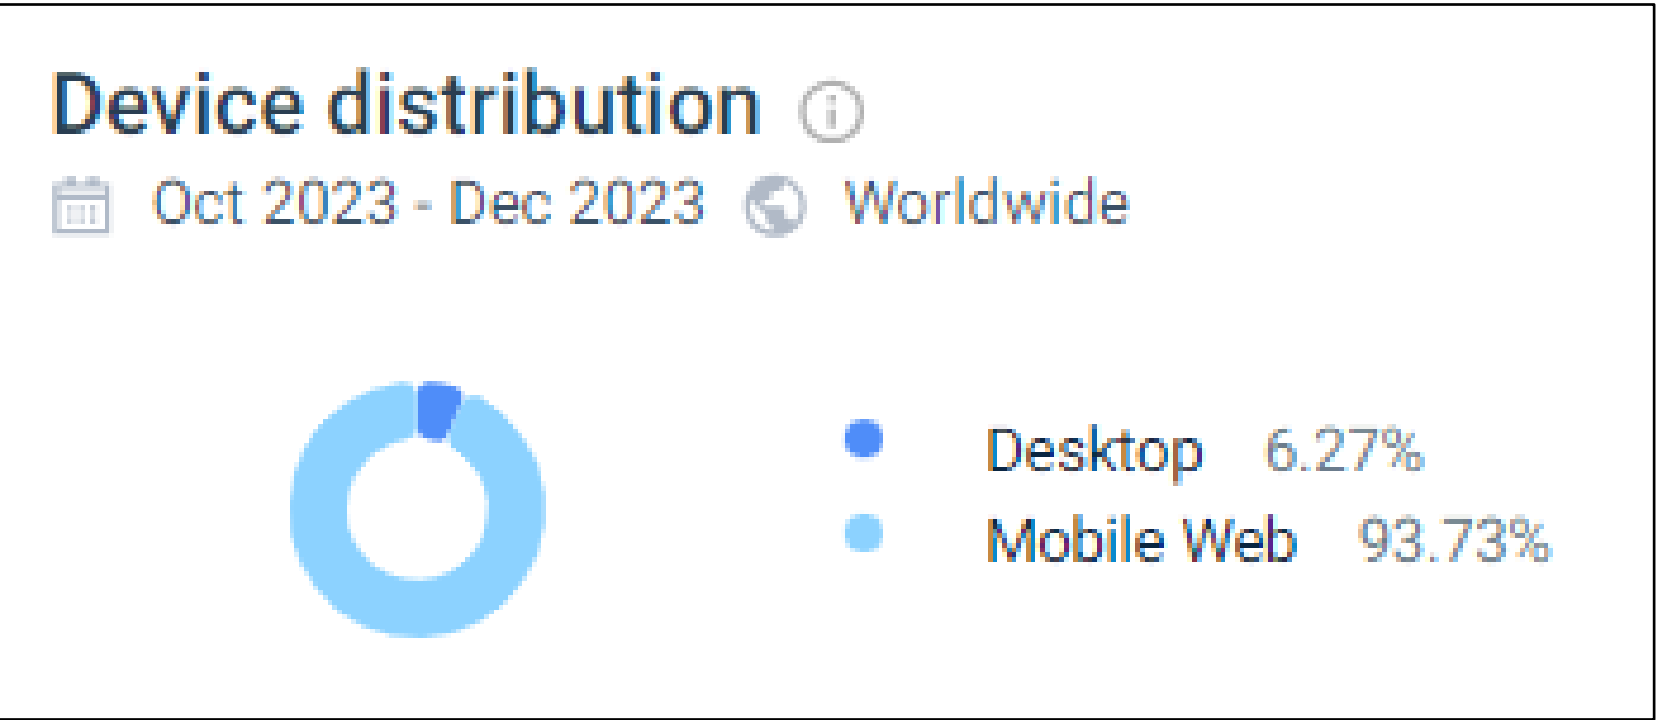

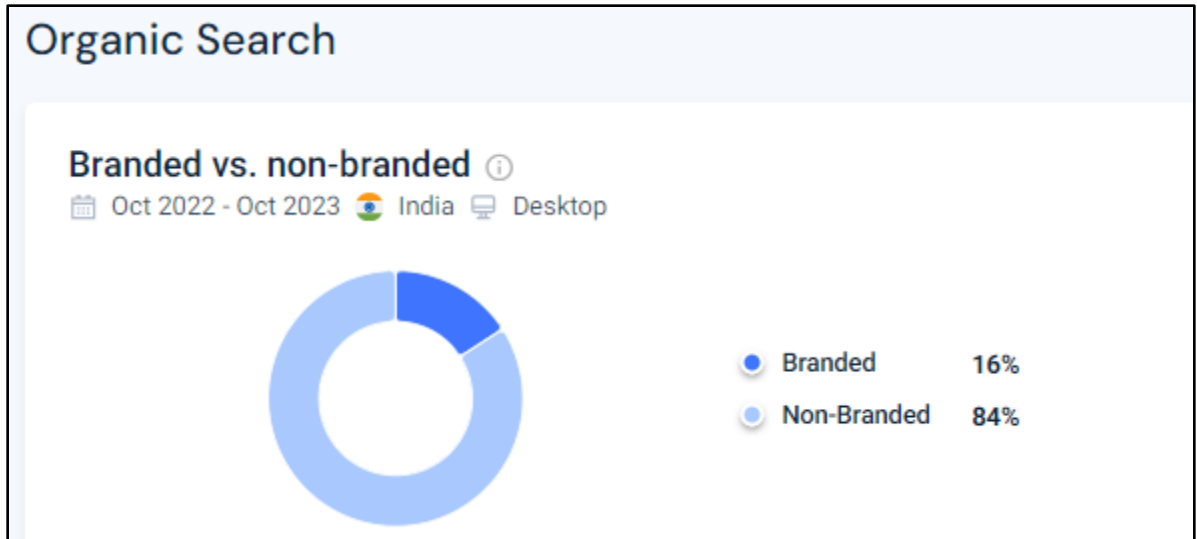

Organic Keywords Growth

Keywords Ranking Position for “Pain Relief”

Traffic Performance
